

TechPod in Practice – hear our customers ...

Rutgers University, New Jersey

"The TechPod has been a wonderful addition to our conference center. Our clients love the ease of use. One turn of the key and everything is up and operational. Our staff loves the efficiency of using one piece of equipment. No more rolling out TV's, document projectors and LCD projectors. Everything is neat and compact in one unit!!

Barbara Loftus, CMP
Manager, Conference Services
Rutgers University Inn and Conference Center

The Academic College of Ashkelon

Roni Ben Yishai, IT Manager of the College:

"During the last two years, 60 TechPod Lecterns were installed at the College. Since then, all 60 TechPod Lecterns are in full capacity and lecturers have increased their use of AV devices. Lecturers appreciate that they don't need to deal with confusing functions during the presentation. Even though 60 TechPod are constantly active, no service calls are made. Additionally, the AV equipment remains protected and secure.

The College is extremely satisfied from TechPod Lecterns which receive the highest performance grade. Furthermore, I would like to point out the swift and professional deployment of Tecom Electronics in this project, installing 30 TechPod Lecterns in such a short period of time."

TechPod installed at the prestigious 300 seats auditorium

Queen Margaret University College, Edinburgh, Scotland

Jim Bain of the Educational Resource Centre at QMUC:

"Our institution is moving to a purpose-built campus, and we reviewed various configurations of equipment for our Lecture Theatres. TechPod was by far the frontrunner, and I am pleased to report that all the staff who is already using it like its simplicity and ease of use, while administration is very pleased with its reliability and minimal maintenance. In fact, none of our academic staff have had a negative comment to make about the unit, only positive ones!"
